PROFESSIONAL SUMMARY

Aspiring Security Operations / Cybersecurity Analyst with hands-on lab experience in **penetration testing, network security, and Linux system administration** using VirtualBox, Kali Linux, and Metasploitable. Oracle Cloud Infrastructure Generative AI Professional (certified) with applied **prompt engineering** and AI-assisted workflow experience. Completed job simulations from **Deloitte and Mastercard** covering incident triage and threat analysis. Actively practicing offensive/defensive security fundamentals on TryHackMe. Seeking an entry-level or internship role in **SOC Analysis, Cybersecurity, or Applied AI Security**.

CORE COMPETENCIES

Security: Penetration Testing, Vulnerability Assessment, Network Security, Threat Analysis, Incident Response Fundamentals, Ethical Hacking, IDS/IPS Concepts, Security Fundamentals

Platforms & Tools: Kali Linux, VirtualBox, Metasploitable, Linux (Ubuntu/Debian), Git, GitHub, VS Code, Wireshark (basic)

Programming: Python, SQL (Beginner), C (Beginner), Bash Scripting (Basic)

Cloud & AI: Oracle Cloud Infrastructure (OCI), Generative AI, Prompt Engineering, AI-Assisted Development

Practice Platforms: TryHackMe

EXPERIENCE

Mastercard Cybersecurity Job Simulation

2025

- Completed a simulated SOC analyst workflow — triaged flagged security alerts, evaluated indicators of compromise, and documented findings following industry incident-response format.
- Applied structured threat-analysis methodology to distinguish false positives from genuine risk signals in a simulated enterprise environment.

Deloitte Cyber Job Simulation

2025

- Investigated a simulated cybersecurity breach scenario, analyzing logs and identifying attack vectors consistent with real-world incident response practice.
- Delivered a written risk assessment summary modeled on client-facing security consulting deliverables.

Independent Security Researcher — Home Lab

2025 – Present

- Built a multi-VM penetration testing lab using VirtualBox with Kali Linux as the attack platform and Metasploitable as the vulnerable target, practicing reconnaissance, enumeration, and exploitation in an isolated network.
- Completed hands-on rooms on TryHackMe covering Linux fundamentals, networking, and offensive security basics, reinforcing concepts through applied exercises rather than passive study.

PROJECTS

AI-Assisted Website Build

- Designed and shipped a responsive school website concept using an AI-assisted no-code builder, applying UI/UX fundamentals — visual hierarchy, navigation flow, and mobile-first responsive layout.

EDUCATION

Manipal University Jaipur

2026 – 2029

Bachelor of Computer Applications (BCA) — Specialization in Cybersecurity

Assam Higher Secondary Education Council (AHSEC)

2025

Class XII — 66%

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — Oracle
- Fundamentals of Cybersecurity — Zscaler
- Cybersecurity — Basic Level — IIT Madras
